

International Conference 'Computational and Corpus-based Phraseology'

Malaga, 25-27 September 2019

Conference topics

The forthcoming international conference 'Computational and Corpus-based Phraseology' will take place in Malaga from 25 to 27 September 2019.

The conference will focus on interdisciplinary approaches to phraseology and will invite submissions on a wide range of topics, including, but not limited to: corpus-based, psycholinguistic and cognitive approaches to the study of phraseology, the computational treatment of multi-word expressions, and practical applications in translation, lexicography and language learning, teaching and assessment.

Submissions and publication

EUROPHRAS 2019 invites three types of submissions: regular papers, short papers and poster presentations.

- Submissions as regular papers should not exceed 15 pages including references; their minimum length should be 12 pages. The accepted regular papers will be published in a Springer LNAI volume which will be available at the time of the conference. The regular papers should be written in English.
- Short papers should not exceed 7 pages excluding references. The accepted short papers will be published as conference e-proceedings with ISBN and will be also available at the time of the conference. Short papers can be in English and Spanish.
- Poster presentations should not exceed 4 pages excluding references. Accepted papers for poster presentations will be included in the conference e-proceedings along with the short papers. Poster presentations can be in English and Spanish.

Each submission will be reviewed by at least three members of the Programme Committee. The first call for papers will provide details on the submission procedure and on the conference schedule, including submission and notification deadlines.

The proceedings will be published as a volume and also in the form of e-proceedings which will be both available at the conference. Call for submissions describing continuation and/or more details of the studies presented at Europhras'2019 will be announced after the conference and the accepted papers reporting these new developments will be published as another volume and/in a special issue of a journal.

Keynote Speakers

Sylviane Granger, Université Catholique de Louvain

Natalie Kübler, Paris Diderot University

Kathrin Steyer, Institute of German Language

Aline Villavicencio, Federal University of Rio Grande do Sul and University of Essex

Programme Committee

The Programme Committee features experts in different aspects of corpus-based and computational phraseology and includes:

Nicoletta Calzolari, Institute for Computational Linguistics
María Luisa Carrió Pastor, Polytechnic University of Valencia
Sheila Castilho, Dublin City University
Ken Church, Baidu
Jean-Pierre Colson, Université Catholique de Louvain
Gloria Corpas Pastor, University of Malaga (Co-Chair)
Anna Čermáková, Charles University
Dmitrij Dobrovolskij, Russian Language Institute
Peter Ďurčo, University of St. Cyril and Methodius
Natalia Filatkina, University of Trier
Thierry Fontenelle, Translation Centre for the Bodies of the European Union
José Enrique Gargallo, University of Barcelona
Ulrich Heid, University of Hildesheim
Elvira Manero, University of Murcia
Carmen Mellado Blanco, University of Santiago de Compostela
Ruslan Mitkov, University of Wolverhampton (Co-Chair)
Pedro Mogorrón Huerta, University of Alicante
Johanna Monti, "L'Orientale" University of Naples
Esteban T. Montoro, University of Granada
Sara Moze, University of Wolverhampton
Michael Oakes, University of Wolverhampton
Stéphane Patin, Paris Diderot University
Alain Polguère, University of Lorraine
Carlos Ramisch, Laboratoire d'Informatique Fondamentale de Marseille
M^a Ángeles Recio Ariza, University of Salamanca
Ute Römer, Georgia State University
Leonor Ruiz Gurillo, University of Alicante
Julia Sevilla Muñoz, Complutense University of Madrid
Kathrin Steyer, Institute of German Language
Joanna Szerszunowicz, University of Bialystok
Benjamin Tsou, City University of Hong Kong
Agnès Tutin, University of Stendhal
Aline Villavicencio, Federal University of Rio Grande do Sul and University of Essex

Organisation

The forthcoming international conference 'Computational and Corpus-based Phraseology' is jointly organised by the European Association for Phraseology EUROPHRAS, the University of Malaga (Research Group in Lexicography and Translation), the University of Wolverhampton (Research Group in Computational Linguistics) and the Association for Computational Linguistics - Bulgaria.

Further information and contact details

The first call for papers is expected in January 2019 and registration will be open as from April 2019.

The conference website (<http://www.lexytrad.es/europhras2019>) will be updated on a regular basis. For further information, please email europhras2019@gmail.com
