

Cómo crear una cuenta START

START V2 es una herramienta en línea para gestionar la revisión por pares en congresos y talleres. Ayuda a simplificar todos los pasos del proceso editorial, incluyendo el envío de artículos/resúmenes, la formación del comité, la revisión de artículos, etc.

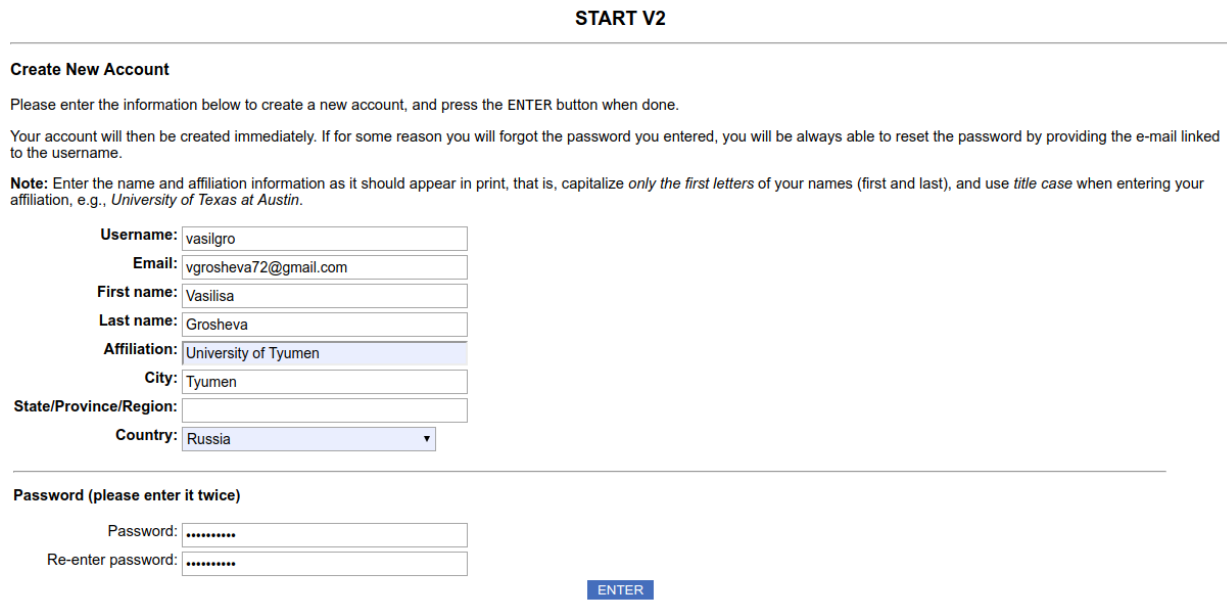

Para crear una cuenta (para enviar un artículo a un congreso, p.ej. EUROPHRAS 2019) siga estos tres pasos. Tardará menos de un minuto, dependiendo de la rapidez con la que teclee el nombre de usuario o piense una contraseña.

1. Haga clic en el enlace que encontrará en la web de EUROPHRAS 2019, que le llevará a esta página. Haga clic en el hipervínculo en mayúsculas ‘HERE’.

The screenshot shows a registration page titled "Computational and Corpus-based Phraseology". It features two input fields: "Enter Username:" and "Enter Password:". Below these fields, there are two lines of text: "New user? please register first by clicking [HERE](#)." and "If you lost or forgot your password, please click [HERE](#).". A red arrow points from the "HERE" link in the second line to the "HERE" link in the first line. The "HERE" link in the first line is circled in red.

2. En la página siguiente, introduzca su información personal tal y como aparecerá en el artículo (no el nombre de usuario). Por ejemplo:

The screenshot shows the "START V2" registration form. It is titled "START V2" and has a section "Create New Account". Below this section, there is a paragraph of instructions: "Please enter the information below to create a new account, and press the ENTER button when done. Your account will then be created immediately. If for some reason you will forgot the password you entered, you will be always able to reset the password by providing the e-mail linked to the username." A note follows: "Note: Enter the name and affiliation information as it should appear in print, that is, capitalize *only the first letters* of your names (first and last), and use *title case* when entering your affiliation, e.g., *University of Texas at Austin*." The form contains several input fields: "Username:" (with the value "vasilgro"), "Email:" (with the value "vgrosheva72@gmail.com"), "First name:" (with the value "Vasilisa"), "Last name:" (with the value "Grosheva"), "Affiliation:" (with the value "University of Tyumen"), "City:" (with the value "Tyumen"), "State/Province/Region:" (empty), and "Country:" (with a dropdown menu showing "Russia"). Below these fields, there is a section "Password (please enter it twice)" with two input fields: "Password:" and "Re-enter password:", both containing masked characters. At the bottom right of the form, there is a blue button labeled "ENTER".

3. Al hacer clic en ‘enter’, verá la confirmación de que su cuenta ha sido creada correctamente.

START V2

Your account has been created, and an e-mail with the user information was sent to the address you entered.

If you need to reset your password, please go to the login page and click on the lost password link.
